GUIDELINES

- Respect and preserve nature, as it is fragile and should be protected for future generations
- Be mindful of sheep and birds you may encounter in the fields – or on the roads!
- Remember to bring your rubbish with you after hiking in the mountains
- Be particularly careful when hiking in areas with loose stones and rocks
- Refrain from walking too close to the cliffs, especially in wet areas when the ground can be slippery
- Check the weather forecast to see if conditions are favourable for walking/hiking
- The weather can be unpredictable and change rapidly. It is a good idea to always wear layered clothes suitable for the weather
- Remember that some hikes are not recommended without a local guide. Seek information at the Regional Tourist Centres, in brochures, websites etc. before you go out hiking
- Be thoughtful of the locals and respect their privacy as much as possible
- If you plan on flying a drone, please read and follow the guidelines on www.visitfaroeislands.com under Plan your Stay
- Lastly, remember to close your eyes and take a deep breath of the freshest air in the world!

Enjoy the Faroe Islands!
